IMS GHAZIABAD

(UNIVERSITY COURSES CAMPUS)

ABOUT IMS GHAZIABAD

IMS Ghaziabad was founded in 1990 by a group of visionaries and intellectuals to impart quality education in a stimulating and innovative environment where students are empowered with knowledge and professional skills while upholding the values of integrity, tolerance and mutual respect. Since its inception the group has promoted education in the areas of Management, International Business, Tourism, Information Technology, Bio-Sciences, Engineering Sciences and Journalism through its three educational campuses equipped with state of art infrastructure. IMS has attained a unique and a highly respectable place amongst the best professional education institutions in India.

RECOGNITIONS

From the time of inception, IMS Ghaziabad University Courses Campus has promoted education in the areas of Management Sciences, Tourism, Information Technology, Bio-Sciences, Engineering Sciences and Journalism through its three educational campuses equipped with state of art infrastructure. IMS has attained a unique and a highly respectable place amongst the best professional education institutions in India. The institute is an ISO 9001:2008 certified and accredited by National Assessment and Accreditation Council (NAAC) with Grade "A". The institute has been ranked as 13th Best BBA Institutes in North India by Times B School Survey. It was also conferred as Best Campus for Industry Oriented Management Education in India during 2nd Asia Pacific Education Leadership Awards 2019 organized by ASSOCHAM and Education Post. ABOUT THE CONFERENCE

The disruptions and innovations transforming the world today would pave the path for future direction and growth. The existing conditions and ecosystems are no longer capable for delivering superior results that would fuel the next wave of development. The Covid-19 pandemic has challenged the earlier ways of working in a multi-dimensional manner impacting each aspect of the world's business working. The core pillars of every business now have to be reinitiated with a completely new and unique approach for the interest of all the stakeholders. Collaboration between research and practicality thus would provide the right answers to all future problems. The implications of research have further been strengthened by the transformational business changes creating the need for disruptions and incremental changes to take place. With a vision to always build academic excellence and research depth, IMSUC, Ghaziabad is pleased to announce the **"International Conference on Building Resilience and Sustainability for India in an Ever Changing Turbulent World: A vision for 2030"** on **21st - 22nd April, 2022**.

The multi-disciplinary nature of the international conference would seek to collaborate with global level institutions and reputed journals to stimulate the best of thoughts and practices to guide how the future India would look like. Under the current conditions and V shaped economic recovery of the country leaves many questions unanswered about how the post pandemic era would impact each industry like education, pharmaceuticals, technology, banking, media, services, manufacturing, etc. The purpose of the conference is to bring together the best of thoughts, practices and innovations from both industry and academia that would contribute in developing the right framework for the future to adopt. With the changes that have taken place in the global economy, organizations and institutions have been pressurized to change their ways of working and also revise their future growth objectives. The new normal in the current disrupted world needs to be further researched for the possible solutions that can be developed by both academia and industry for survival.

MAIN THEME OF THE CONFERENCE

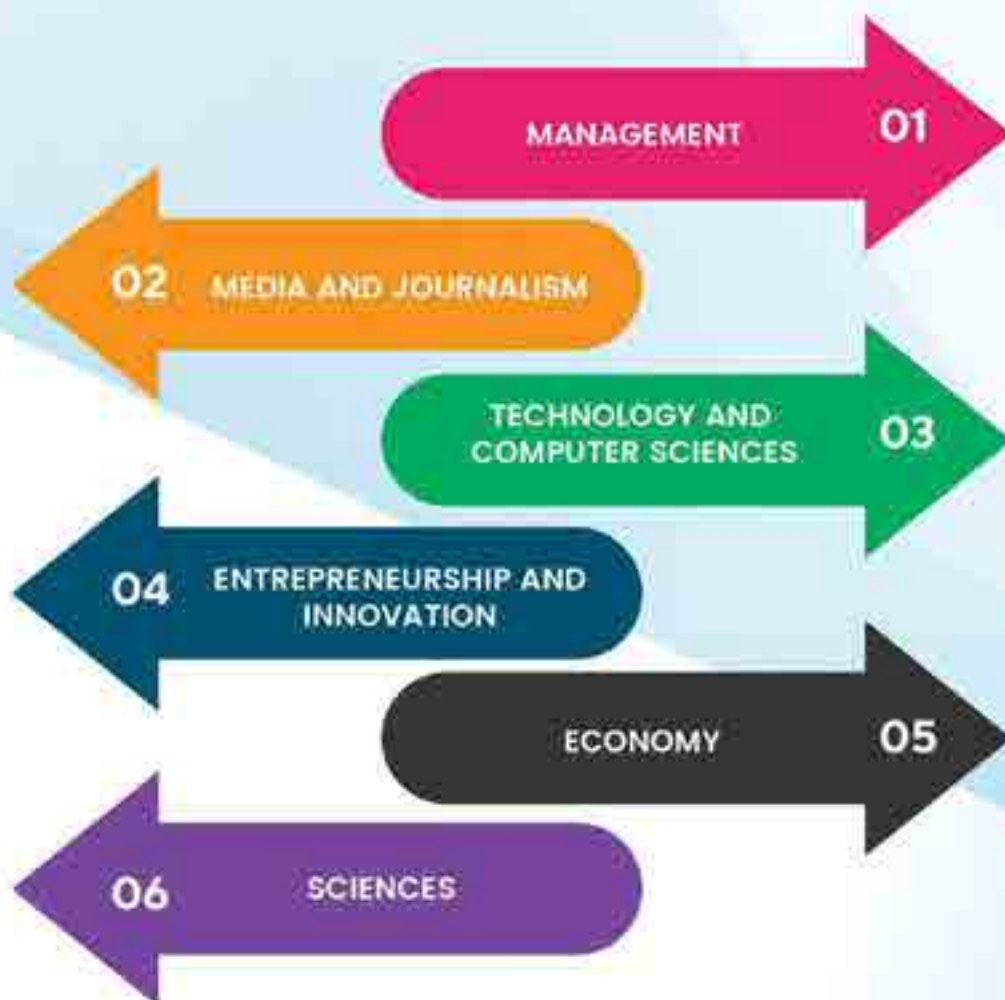

The transformational journey of the economy from the pre-pandemic era to the economic recovery in the post pandemic world will be remembered in history by all the main stakeholders. In this changed world, each business and sector is aiming at survival and sustainability. The worst is over and what now the world contemplates is the new transformation which will determine the future course of action. Advancements in various fields of technology and medicine would lead to the post pandemic recovery of building the India of 2030. This vision needs to be based on the holistic approach for the economy where technology and people driven focus would lead to sustainability.

The nation and the political setup need to focus on the new capabilities that need to be identified and developed for the country to reach its vision for 2030. To restart the process of globalization and economic recovery, the support of all the stakeholders is needed. The future holds much larger and bigger opportunities in the area of public health care system that needs to be amalgamated with digital technologies. The post pandemic era requires resilience to be built through focus on science, technology and innovation. The conference also aims to build upon innovative methods to rebuild healthcare and well being of the people through integration of technology. The goals need to be achieved in the right direction leading to environment and sustainable development. The key outcomes can be achieved only with the help of involving entrepreneurs into the entire ecosystem of developing the post pandemic resilient nation leading to the successful achievement of Vision 2030 for the country.

CALL FOR PAPERS

Abstracts of research papers with maximum word count of 250-300 words are invited for the conference in all areas of management, sciences, media, journalism, technology and computer sciences that are related to the theme of the conference that can be any of the following but not limited to:

CONFERENCE TRACKS
